

5X

The Trailer Valet 5X is pound-for-pound the best in its class for its towing capacity and compact build and shows amazing versatility with its built-in jack. Instead of driving your vehicle to your trailer, use this heavy-duty jack to drive your trailer to your hitch vehicle. The 5X also makes it easy to park or move your trailer into tight spots or driveways and to position it in a garage. It allows you to take corners and make slight adjustments in steering while the trailer is moving.

HANDLE WITH PRECISION

The ergonomic handle gives you precise steering control and automatically engages the brake if it is ever dropped.

POWER UP WITH A DRILL

Swap out the crank handle for the drill attachment (sold separately) and use a drill to move the 5X.

ADJUST TO FIT YOUR FRAME

An adjustable clamp bracket can accommodate trailer frames up six inches in height

MOVE WITH EASE

Maintain perfect grip on roads and garage floors with never-flat tires

5K
