

XL

The Trailer Valet XL makes it easy to park or move your trailer of up to 10,000 lbs (4,500 kg) in tight spaces. Take corners and position your trailer exactly as you want it by steering as you move. The XL hooks up to a standard trailer frame via the coupler (or optional bracket) and can be operated manually by using the included hand crank as a trailer hand dolly. Low and high gear ability allow switching between precision of control and rapid movement as needed.

POWER UP WITH A DRILL

Swap out the crank handle for the drill attachment and use a drill to move the XL.

HANDLE WITH PRECISION

The ergonomic handle gives you precise steering control and automatically engages the brake if it is ever dropped.

HITCH TO YOUR COUPLER

Choose between a 2 inch or 2 5/16 inch hitch ball (or a bracket mount) for a secure connection to your trailer.

MOVE WITH EASE

Maintain perfect grip on roads and garage floors with never-flat tires.
